

bibliotheca flexBin™ and flex autoBin™

flex AMH™ bin options enable library items to be gently accumulated and sorted

All of the flex AMH™ bin options integrate seamlessly with the flex AMH™ return and sorting system. Each bin can easily pull away from the docking station, allowing staff to smoothly glide them around the workroom. The spring-loaded base also provides a sponge-like reflex, gently protecting items from being damaged as they are sorted into the proper location.

flexBin™ standard

flexBin™ large

flex autoBin™

designed to accommodate

A smaller, more compact option, the flexBin™ standard fits within your existing space, giving libraries all the benefits of return and sorting while preserving the flow and design of your unique library.

make room for more

Be more efficient and save staff time with the spacious and accommodating flexBin™ large. Built to handle large numbers of items, this bin requires less staff attention and easily transforms into a make-shift cart.

ultimate experience for staff

With returned items at a height convenient for staff, the flex autoBin™ improves overall back room workflow and reduces back strain for library staff through ergonomic and mechanical height-adjustable design.
